About This Game

Crush Enemies with your Sniping Skills in the Immersive Sharpshooter : Sniper Rust VR!

Toughen Up! Become an Elite Sniper and Embark on a Dangerous Mission Against a Global Insurgency in this hair-raising, breath taking Virtual Reality First-Person Sniping Experience where any shot could be your last!

Mission Details

The players have spoken! We've heard your feedback, and updated Sniper Rust VR with some of the most popular requests. Get back in the action with:

- Cutting-Edge Weaponry - Stalk your prey with a plethora of lethal firearms, locked and loaded with special functions suited for specific occasions. Available weapons include real-world guns like the DSR-50 and SVD sniper rifle, as well as the MaC-7, which was inspired by the CheyTac M200, and the Scout Rifle-inspired DG-5000.
- Death-Dealing Enemy Troops and Vehicular Combatants - Diverse enemy classes make every playable mission a challenge: be wary of well-concealed snipers, air/group assaults and traps behind enemy lines.
- Immersive Virtual Reality Experience - With numerous uniquely designed environments to explore — including ports, forests, mountains, deserts and even ancient temples — you'll feel like you're truly part of Sniper Rust VR's virtual

world! Although with multiple, varied objectives to complete on your adventure, there'll hardly be time to take in the sights.

- A new bonus level – ready for a new challenge? New enemies lay in wait – and so does a new firearm for you to dispatch them with.
- New cover mechanics – catch your breath and stay out of sight by ducking behind crates, barrels, and pallets. When the bullets stop, you go.
- Gun recoil – every shot counts. Feel the power of your firearm each time you pull the trigger.
- Updated graphics – see the environment come to life with a graphical overhaul and more realistic lighting and shadows.
- Achievements – get recognized for your excellence with 10 new player achievements, and get rewarded with killer customization options: 2 new skins for each gun & 2 new gloves.
- Action-Packed Soundtrack - Intense orchestral sounds composed by John Leonard French are the perfect accompaniment for the game's thrilling, edge-of-your-seat action sequences.

Sniper Rust VR is now available for HTC Vive, Oculus Rift, and Steam headsets. Get your gear and get in the game!

Amazing game!! Cant get enough.

Was lucky to play it..... Sorry wreck the leaderboards PMSL at Gadget Show live.

My only gripe is the achievements dont seem to pop and the leaderboards don't add my scores but ive only played for an hour. PS4 controller support is awesome.

Game is perfectly responsive.

Cant recommend enough.. The soundtrack popped up for me on Spotify and I enjoyed it so much, I bought the game without waiting for a sale. I'm very happy having made that decision.. Secret Files 3 treads on very thin ice. It's short, it's got an overly complicated plot line and just doesn't have the charm of the first two games. Not to mention the ending involved watching a 5 second long cut scene and finding out what happened after the end of the game with some images and text. Then, for no reason other than to add some 'levity' they tagged on a terrible 'outtake' reel. It fell right through the ice and died a death. At the moment, I'm not looking forward to 4/Sam Peters and I'm starting to think Deep Silver are giving up on point-n-click adventures. I'd think it was a damn shame if this game wasn't so half-hearted.. I have one word about this game: **HARD**.

At first I thought this game was a little boring at the beginning, because whenever I found a mate another male ruins it or my character gets killed.

But I soon learned how to play it easily, and its fun now. I never beat the full game, but its still kinda fun.

I got it during the winter sale so I didn't pay the full price, but the devs deserve the money of the full price....

. I am glad they released it because the Norse are a really good team. Really wonderful game, I haven't finished it yet but so far i am loving the story, the controls are smooth, and the graphics/varts are lovely.. Netplay is literally unplayable half the time.

Such a shame because the game mechanics are as good as Soku or maybe even IaMP.. Mirred by a multitude of glitches and errors, Milestone definitely took a step backwards with the latest release in the MotoGP series. The most annoying of the glitches with this game is the inability to exit from the game after entering into a career mode. Users find themselves exiting using CTRL-ALT-DEL and then ending the game in the systems processes window. This obviously is a testament to the poor QA by Milestone and their failure to properly BETA the game prior to release. Several users also complain of a buggy Visual C++ Runtime Error. Other graphic anomalies and poor intergration with Nvidia drivers makes this promising game a complete bust. Users will be better off waiting for the game price to drop (which it definitely will in the next few weeks) and/or for Milestone to fix the numerous issues with this game. **STICKK WITH MOTOGP13** and you'll defilnitely come out on top!. Enjoy the thought and care that went into this game. If you enjoy programming or want to learn the logic of programming using an easy to use interface this game is for you. My first programming game was Robot Odessy, then Mind Rover so I have a background in programming. The cost is very reasonable for all that you get. **BEST GAME ON STEAM**.

645 hours in, and so happy with my investment. Hopping into one of my ships after a long day for a fly around a planet is one of my absolute favourite things to do. There's always something new to explore, and I haven't even started any of the Thargoid content yet. Flight mechanics will take some getting used to - but hang in there because you'll learn to love it with some practice. There's been a few stability issues over the years, but they're usually fixed by the next time I login, so don't let comments about stability or issues put you off purchase. Enjoy!. Sorry, but I can not recommend this game. You have to click with your mouse button on the left or right side of the screen to move your tank. But mostly the tank moves the other way.

[. Extremely bizarre game.](#)

[The overall environment looks good, but my problem is that I didn't really understand the story and the camera is pretty annoying to control in the tape worlds.](#)

[Game was pretty boring though.. it is so realistic](#)

[. Pretty relaxing rhythm game.](#)

[I can perty much get a EX rank for every song first try so there isn't really a challenge.](#)

[Lv 10 is about 3 star in osumania.](#)

[8/10. Sets itself apart from the dozens of other hidden object games by putting you in the role of an antique collector looking to stock your shop. If you like nosing through other peoples' stuff, you should enjoy Pickers.. Love this to pieces, it really satisfies. If you grew up with R-Type and attacking mutant camels, you should be able to appreciate this one!. Yes, if you like pure spam colonies the second u start. If, like me, you like more depth to the game. Then no.. Awesome game to play with friends just not recommended for anyone playing on a laptop get a desktop to play your game will play much smoother.. In this game, you move a spaceship left and right as it automatically scrolls forward, avoiding obstacles as you progress. It's a simple premise, and Avoid: Sensory Overload really isn't breaking any new ground. But what begins as a rather mediocre addition to the pile of retro-inspired games available on Steam quite rapidly develops into one of the toughest games in your library, and what's more, it's addictive. At advanced levels, the game's pace is breakneck, and the course is littered with pitfalls and obstacles. Leagues harder than comparable titles like Audiosurf, Avoid: Sensory Overload is a no B.S. test of skill and reaction time. Your average gamer probably won't make it through the Medium levels, and most of us probably won't make it through the Hard levels. Even if you're the kind of Ulillillia tier savant it takes to make it through Extreme difficulty, you can pile on a fresh challenge by playing the Endless mode for a randomly-generated infinite run. At the fair price of \\$5, Avoid: Sensory Overload scratches the itch for a simple game at both extremes: It's fun enough to pick up and play for a quick session, and difficult enough to provide a challenge in the long term.](#)
